G1 CLIMBING + FITNESS · PERSONAL TRAINING

Goals and Progress Tracker

Set goals together, then review them often. A few goals the client really cares about beat a long list.

SAMPLE · DRAFT V0.1
Pending G1 management approval

Client	Trainer	Block starts	Block ends (set together)
Casey Sample	Taylor Trainer (sample)	09/08/2026	12/01/2026

WHY THIS MATTERS

In the client's own words: why do you want this?

I want to keep climbing for years without my shoulders and wrist complaining, and send V4 on the trip in December.

SMART GOALS

Specific · Measurable · Attainable · Realistic · Time-bound. Aim for one main goal and up to two supporting goals. **Outcome** = the result you want. **Performance** = a skill or number you can test. **Process** = a habit you control. Pair an outcome goal with a process goal. Targets are aims, not promises.

Goal 1 (main goal)

Type: ○ Outcome ◉ Performance ○ Process

The goal in one sentence: Send two V4 boulders before the December trip.

How we'll measure it	Starting point	Target	Target date
Number of V4 sends	0	2	12/01/2026

What could get in the way	Our plan and first steps
Shoulder tightness limits pulling. Busy work weeks.	Phase 1, then 2. Train twice a week. Shoulder prep before every climbing session.

Goal 2 (supporting)

Type: ◉ Outcome ○ Performance ○ Process

The goal in one sentence: Shoulders feel comfortable after climbing sessions.

How we'll measure it	Starting point	Target	Target date
My own tightness rating, (	5	3 or lower	12/01/2026

What could get in the way	Our plan and first steps
Eight-hour desk days.	Wall slides daily, short movement breaks at work, rate it each week.

Goal 3 (supporting)

Type: ○ Outcome ○ Performance ◉ Process

The goal in one sentence: Train twice a week with my trainer.

How we'll measure it	Starting point	Target	Target date
Sessions attended	0	2 per week	Ongoing

What could get in the way	Our plan and first steps
Work travel.	Book a recurring slot. Swap a session rather than skip it.

Client
Casey Sample

WEEKLY HABITS (tick each week the target was met)

HABIT OR PROCESS GOAL	TARGET / WK	1	2	3	4	5	6	7	8	9	10	11	12
Sessions attended	2	☑	☑	☑	☑	☐	☐	☐	☐	☐	☐	☐	☐
Wall slides, glute bridges	5 days	☑	☑	☐	☑	☐	☐	☐	☐	☐	☐	☐	☐
Sleep 7 hours	5 nights	☑	☐	☐	☑	☐	☐	☐	☐	☐	☐	☐	☐
Shoulder prep (climbing days)	2 days	☑	☑	☑	☑	☐	☐	☐	☐	☐	☐	☐	☐

MEASURES (pick 5-8 that match the goals; record the same way each time)

MEASURE	BASELINE	WEEK 4	WEEK 8	WEEK 12	TARGET
Plank hold (s)	40	55			75
Incline push-ups (reps)	10	14			20
Knee-to-wall, right (cm)	9	11			12
Shoulders set in hang?	No, shrug	Yes			Yes
Squat differences (count)	2	1			0 or 1
V4 sends	0	0			2
Shoulder tightness (0-10)	5	4			3

Ideas: plank hold · push-ups with good form · knee-to-wall distance · overhead-squat compensations · shoulder position in a supported hang · climbing grade sent · session effort (0-10) · sleep · sessions per week. Body measurements only if the client asks for them.

TRAINING BLOCKS (plan, then adjust at each review)

BLOCK	TRAINING PHASE (OPT)	FOCUS
Block 1 · Weeks 1-4	Phase 1 Stabilization Endurance	Movement quality; hip and shoulder control
Block 2 · Weeks 5-8	Phase 1 to 2 if form holds	Single-leg control; add load to pulling
Block 3 · Weeks 9-12	Phase 2 Strength Endurance	Pulling strength; climbing-specific circuits

CHECK-INS (about every 4 weeks, plus any time the plan changes)

DATE	WINS	CHALLENGES	ON TRACK?	CHANGES TO THE PLAN
10/06/2026	Knees track better; plank +15 s	Busy week; sleep slipped	On track	Add single-leg work
