G1 CLIMBING + FITNESS · PERSONAL TRAINING

Post-Session Follow-Up

Trainer note first (2 minutes), then a short message to the client.

SAMPLE · DRAFT V0.1
Pending G1 management review

Client: Casey Sample
Date: 09/08/2026
Session #: 1
Trainer: Taylor Trainer (sample)
Length (min): 60
OPT phase: Phase 1

FOCUS TODAY

- [x] Assessment
- [x] Movement prep
- [ ] Strength
- [x] Core and stability
- [ ] Cardio
- [ ] Climbing-specific
- [ ] Recovery
- [ ] Other

WHAT WE DID

EXERCISE	SETS X REPS	LOAD / LEVEL	RPE	NOTES AND CUES
Knee-to-wall ankle drill	2 × 8 each side	Bodyweight	3	Right ankle tighter
Glute bridge	2 × 12	Bodyweight	3	Felt it in the glutes
Bird dog	2 × 8 each side	Bodyweight	4	Slow tempo, ribs down
Wall slides	2 × 10	Bodyweight	4	Ribs flare: cue "ribs down"
Band pull-apart	2 × 15	Light band	4	Shoulders shrug: cue "long neck"
Easy bike	5 min	Level 3	4	Passed the talk test

HOW IT WENT

Energy before / after (1-5): 4 / 4
Session effort (RPE 0-10): 4
Soreness check: (●) None ( ) Expected muscle fatigue ( ) Pain flag

If a pain flag: where, when, what happened, what I advised

Wins: Great effort and curiosity. Knees tracked better after a single cue.

Adjust next time: Add single-leg stability next time. Check in on the right wrist before any pulling-heavy work.

Progress toward goals (update the tracker): Baseline recorded and goals set (see tracker).

PLACEHOLDER: where session notes are kept and who can see them. Pending G1 policy on client records. Keep health details out of texts and email until it is set.

SAMPLE — FICTIONAL CLIENT

Client: Casey Sample

BETWEEN SESSIONS (two or three simple things, not a second workout plan)

TASK	HOW OFTEN
Glute bridge, 2 × 12	Most days
Wall slides, 2 × 10	Most days

NEXT SESSION

Day, date, time: Thu 09/10/2026, 6:00 pm

Focus: Hip and shoulder stability

Client should bring: Water, climbing shoes

PLACEHOLDER: scheduling, late and cancellation wording, and anything about packages or payment. Pending G1 management approval. Don't quote prices or policies in messages until it is approved.

MESSAGE TO THE CLIENT (edit the [brackets]; keep it warm, short and general)

Send within a few hours. Use plain words; leave health details for in-person conversations.

Hi Casey, thanks for training with me today. We worked on movement basics and shoulder and hip control, and you did really well with your knee tracking once we added the cue.

Between now and next time:
1. Glute bridge, 2 × 12 - most days
2. Wall slides, 2 × 10 - most days

Some muscle soreness in your glutes and upper back is normal for a day or two. If you notice sharp or worsening pain, numbness, or anything that worries you, skip that exercise, check in with a licensed healthcare professional, and let me know.

Next session: Thursday 09/10/2026, 6:00 pm. Focus: hip and shoulder stability and an easy climbing warm-up. Bring water and your climbing shoes.
Scheduling questions: [placeholder: G1 scheduling wording, pending management approval]
